INTRODUCTION

In 1935 the Bureau of Dairy Industry and the State dairy extension services inaugurated the Nation-wide Dairy Herd Improvement Association proved-sire program. The purpose of this program is to "prove" as fully as possible the breeding value of all sires used in dairy herd improvement association herds and to make the information available in such a way that it will be of the greatest benefit to the owners of the sires as well as to the dairy industry as a whole.

The present publication is the seventh annual list of proved sires issued by the Department of Agriculture since the program was begun. It contains the names and summarized "proved-sire" records of 1,226 sires whose records were tabulated by the Bureau of Dairy Industry between January 1, 1942 and January 1, 1943. Copies of the six previous lists¹ may be consulted in most agricultural college libraries, and copies of some are still available by purchase.

PURPOSE OF THE LIST

Knowledge of a sire's breeding value is of particular importance to the owner of the sire or of the herd in which the sire has been used. Therefore, all information on each proved sire is sent to the owner of the sire as rapidly as the data accumulate and are tabulated. Often,

Pub. 487, price 15 cents. All of these publications except Misc. Pub. 315 may be purchased from the Superintendent of Documents, Washington, D. C.

decrease should not be considered as significant. If the daughters of a sire have an average butterfat production of 25 or more pounds above that of their dams the sire may be considered as raising the production of the herd in which he is used. If the daughters' average butterfat production is 25 pounds or more below that of their dams the sire may be considered as lowering the production of the herd in which he is used, in which case he should be discarded from that particular herd. Such a sire may prove useful in a herd of lower-producing dams, however.

To make the most intelligent selection of a sire, the dairyman should use these proved-sire records to single out the most promising sire and then make every effort to supplement these data with additional information gathered from the herds in which the dams and daughters made their records. Particular attention should be given to the feeding practices and environmental conditions under which the records were made, in order to be assured that the records of the daughters were not made under more favorable conditions than those of the dams or vice versa. It is especially important to determine that there has been no selection of daughters in making the comparison.

Dairymen wishing more information about a listed sire than is contained in the brief summary may write to the herd owner listed, or he may address his request to the State in which the sire was proved, as follows: State Extension Dairyman, In Charge of Dairy Herd Improvement Association Work. The addresses of the State extension dairymen are on page 6.

SONS OF PROVED SIRES

Although many of the sires listed were dead when proved, they may have living sons available for breeding purposes. Information concerning sons of proved sires can be obtained from the State extension dairyman in charge of dairy herd improvement association work in the State in which the sire was proved. The identification numbers of all recorded sons are included in the proved-sire record on file in each State office. It has been demonstrated that sons of good proved sires, that is, sires that have transmitted high-producing capacity to a large percentage of their daughters, can be used with greater assurance of success than sons of sires that have not been proved. Further assurance of success with sons of proved sires is indicated if the sons are out of high-producing dams and if they have high-producing full sisters.

TABLE 1.—Number of proved sires listed by States and breeds

State	Breed							Total
	Ayr-shire	Brown Swiss	Guern-sey	Hol-stein	Jersey	Short-horn	Ameri-can

Total.....	173	1109	1225	1562	1233	121	15	11,226

¹ This number includes 1 or more sires proved with records from some other State as well as from the State indicated.

¹ Omitting duplication of sires.

¹ 2 American Dairy Cattle Club sires are also registered in other breed associations.
